1.2 Airport Layout

Frankfurt has four runways, the operational concept is summarised in the following table:

RWY	Usage
18	Departures only
07L/25R	Arrivals only
07C/25C	Mainly departures
07R/25L	Mainly arrivals

07L/25R may not be used for aircraft types A124, A380, B747 and MD11, instead 07R/25L will be assigned.

Important: Standard scenery for FSX and P3D does not include the northernmost runway (07L/25R). If you **do not** have a newer scenery, you should report this to the controllers as early as possible.
